

## Q1 Instructions

0 Points

To receive full credit on this quiz, you must score at least 50%.

The Github repo for Lecture 23 is at:

<https://github.com/ucsd-cse12-sp21/ucsd-cse12-sp21.github.io/tree/master/lectures/lecture-23>

## Q2 FileInputStream

1 Point

Based on the file stream classes from the lecture, **select all** of the following methods that must be included in the FileInputStream class so it will compile:

☒ next()☒ hasNext()☐ write()☒ close()☐ flush()

### Q3 FileOutputStream

1 Point

Select all that are true for FileOutputStream:

☒ Uses a buffer to store data before it's written to a file.☐ Calling close() is not required when writing to a file.☐ If the buffer is full, more data cannot be written to the file.☒ All the FileWriter methods used in the class can throw an IOException.
